

## **Published Papers on Modelling**

ADCROFT, A.J., HILL, C.N., AND MARSHALL, J.C.

A new treatment of the Coriolis terms in C-grid models at both high and low resolutions. 1999  
Monthly Weather Review, 127(8), 1928-1936.

AKITOMO, K.

Open-space deep convection due to thermobaricity. 2. Numerical experiments. 1999  
Journal of Geophysical Research, 104(C3), 5235-5249.

AKITOMO, K., MASUDA, S. & AWAJI, T.

Kuroshio path variation south of Japan: stability of the paths in a multiple equilibrium regime. 1997  
Journal of Oceanography, 53(2), 129-142.

ANDERSON, D. L. T. & CARRINGTON, D. J.

Modelling interannual variability in the Indian Ocean using momentum fluxes from the UKMO and ECMWF.  
1993

Journal of Geophysical Research, 98, 12483-12499.

ANDERSON, D. L. T., D. J. CARRINGTON, R. CORRY AND C. GORDON

Modelling the variability of the Somali Current. 1991

J. Marine Res., 49(4), 659-696.

ARRITT, R.W., GOERING, D.C., AND ANDERSON, C.J.

The North American monsoon system in the Hadley Centre coupled ocean-atmosphere GCM. 2000  
Geophysical Research Letters, 27(4), 565-568.

AUMONT, O., ORR, J.C., MONFRAY, P., MADEC, G., AND MAIER-REIMER, E.

Nutrient trapping in the equatorial Pacific: the ocean circulation solution. 1999

Global Biogeochemical Cycles, 13(2), 351-369.

BACKHAUS, J.O., AND KAMPF, J.

Simulations of sub-mesoscale oceanic convection and ice-ocean interactions in the Greenland Sea. 1999  
Deep-Sea Research II, 1427-1455.

BAGNO, A.V.

Numerical simulation of the circulation of the North Atlantic with surface freshwater flow taken in to account. 1996

Izvestiya Atmospheric and Oceanic Physics, 32(6), 779-789.

BAGNO, A.V., DIANSKIY, N.A., AND MOSHONKIN, S.N.

Interaction of the ocean surface temperature anomalies with the circulation in the North Atlantic. 1996  
Oceanology, 36(5), 652-661.

BAGNO, A.V., GARASHCHUK, R.V., AND ZALESNYI, V.B.

A model of the large-scale ocean circulation and sea ice evolution. 1996  
Oceanology, 36(2), 179-187.

BAINES, P.G. & HUGHES, R.L.

Western boundary current separation: inferences from a laboratory experiment. 1996  
Journal of Physical Oceanography, 26(12), 2576-2588.

BANKS, H.T.

Ocean heat transport in the South Atlantic in a coupled climate model. 2000  
Journal of Geophysical Research, 105(C1), 1071-1091.

BASU, S., KUMAR, R., GAIROLA, R.M., AND PANDEY, P.C.  
Assimilation of TOPEX altimeter data in a reduced-gravity model of the northwestern Indian Ocean. 1999  
Marine Geodesy, 22(3), 143-155.

BATTEEN, M.L. AND BUTLER, C.L.  
Modeling studies of the Leeuwin Current off Western and Southern Australia. 1998  
Journal of Physical Oceanography, 28(11), 2199-2221.

BECKMANN, A. & DOSCHER, R.  
A method for improved representation of dense water spreading over topography in geopotential-coordinate models. 1997  
Journal of Physical Oceanography, 27(4), 581-591.

BELL, M.J.  
Vortex stretching and bottom torques in the Bryan-Cox ocean circulation model. 1999  
Journal of Geophysical Research, 104(C10), 23545-23563.

BERLOFF, P. AND MEACHAM, S.P.  
On the stability of the wind-driven circulation. 1998  
Journal of Marine Research, 56(5), 937-993.

BERLOFF, P.S., AND MCWILLIAMS, J.C.  
Large-scale low-frequency variability in wind-driven ocean gyres. 1999  
Journal of Physical Oceanography, 29(8) Part 2, 1925-1949.

BLANCHET, I., FRANKIGNOUL, C. & CANE, M.A.  
A comparison of adaptive Kalman filters for a tropical Pacific Ocean model. 1997  
Monthly Weather Review, 125(1), 40-58.

BOENING, C.W. & SCHOTT, F.A.  
Deep currents and the eastward salinity tongue in the equatorial Atlantic: results from an eddy-resolving, primitive equation model. 1993  
Journal of Geophysical Research, 98(C4), 6991-6999.

BONATTI, J.P., AND RAO, V.B.  
Meso-scale perturbations and thermocline fronts in the south Atlantic Ocean. 1999  
Dynamics of Atmospheres and Oceans, 30(1), 1-24.

BRACONNOT, P., MARTI, O. & JOUSSAUME, S.  
Adjustment and feedbacks in a global coupled ocean-atmosphere model. 1997  
Climate Dynamics, 13(7/8), 507-519.

BRYAN, K.  
Ocean circulation models. 1991  
pp.265-285 in, Strategies for future climate research, (ed.M.Latif). Hamburg: Max-Planck-Institut fur Meteorologie. 387pp.

BRYAN, K., DUKOWICZ, J.K., AND SMITH, R.D.  
On the mixing coefficient in the parameterization of bolus velocity. 1999  
Journal of Physical Oceanography, 29(9), 2442-2456.

BYE, J.A.T., AND WOLFF, J-O.  
Atmosphere-ocean momentum exchange in general circulation models. 1999  
Journal of Physical Oceanography, 29(4), 671-692.

CAI, W.

Zonal extent of oceans, high-latitude fresh water supplies and the thermohaline circulation. 1998  
Quarterly Journal of the Royal Meteorological Society, 124(547), 811-828.

CAI, W., AND GORDON, H.B.

Southern high-latitude ocean climate drift in a coupled model. 1999  
Journal of Climate, 12(1), 132-146.

CAI, W., GREATBATCH, R.J. & ZHANG, S.

Interdecadal variability in an ocean model driven by a small, zonal redistribution of the surface buoyancy flux. 1995

Journal of Physical Oceanography, 25(9), 1998-2010.

CAI, W., SYKTUS, J., GORDON, H.B. & O'FARRELL, S.

Response of a global coupled ocean-atmosphere-sea ice climate model to an imposed North Atlantic high-latitude freshening. 1997

Journal of Climate, 10(5), 929-948.

CALDEIRA, K. & DUFFY, P.B.

Sensitivity of simulated CFC-11 distributions in a global ocean model to the treatment of salt rejected during sea-ice formation. 1998

Geophysical Research Letters, 25(7), 1003-1006.

CAMPIN, J-M., AND GOOSSE, H.

Parameterization of density-driven downsloping flow for a coarse-resolution ocean model in z-coordinate. 1999

Tellus A, 51A(3), 412-430.

CAPOTONDI, A. & HOLLAND, W.R.

Decadal variability in an idealized ocean model and its sensitivity to surface boundary conditions. 1997  
Journal of Physical Oceanography, 27(6), 1072-1093.

CARVOS NARVAEZ, W., M.J. ORTIZBEVIA AND J.M. OBERHUBER

The variability of the tropical Atlantic. 1998

J. Geophys. Res., 103(C40), 7475-7489.

CASTELLARI, S., PINARDI, N. AND LEAMAN, K.

A model study of air-sea interactions in the Mediterranean Sea. 1998

Journal of Marine Science, 18(1/3), 89-114.

CATTLE, H. & GORDON, C.

Specification and variability of the surface forcing of the ocean. 1990

pp.193-210 in, Climate-ocean interaction, (ed.M.E.Schlesinger). Dordrecht: Kluwer Academic for NATO/CEC.

385pp.

CHEN, H-T., YAN, X-H., SHAW, P-T. & ZHENG, Q.

A numerical simulation of wind stress and topographic effects on the Kuroshio Current path near Taiwan.

1996

Journal of Physical Oceanography, 26(9), 1769-1802.

CHU, P.C., Y. CHEN AND S. LU

On Haney-type surface thermal boundary conditions for ocean circulation models. 1998

J. Phys. Oceanogr., 28(5), 890-901.

COHEN-SOLAL, E., AND LE TREUT, H.

Unstable behaviour of an upper ocean-atmosphere coupled model: role of atmospheric radiative processes and oceanic heat transport. 1999  
Climate Dynamics, 15(12), 895-908.

CONDIE, S.A. & KAWASE, M.  
Models of abyssal flow in basins separated by a mid-ocean ridge. 1992  
Journal of Marine Research, 50(3), 421-440.

CUMMINS, P.F.  
Remarks on potential vorticity mixing over topography and momentum conservation. 2000  
Deep-Sea Research I, 47(4), 737-743.

CURCHITSER, E.N., HAIDVOGEL, D.B., AND ISKANDARANI, M.  
On the transient adjustment of a mid-latitude abyssal ocean basin with realistic geometry: the constant depth limit. 1999  
Dynamics of Atmospheres and Oceans, 29(2/4), 147-188.

CZAJA, A., AND FRANKIGNOUL, C.  
Decadal buoyancy forcing in a simple model of the subtropical gyre. 1999  
Journal of Physical Oceanography, 29(12), 3145-3159.

D'ALESSIO, S.J.D., K. ABDELLA & N.A. MCFARLANE  
A new second-order turbulence closure scheme for modeling the oceanic mixed layer. 1998  
J. of Phys. Oceanogr., 28(8), 1624-1641

DANABASOGLU, G.  
On the wind-driven circulation of the uncoupled and coupled NCAR Climate System ocean model. 1998  
J. Climate, 11(6), 1442-1454.

DELHEZ, E.J.M., CAMPIN, J-M., HIRST, A.C., AND DELEERSNIJDER, E.  
Toward a general theory of the age in ocean modelling. 1999  
Ocean Modelling, 1(1), 17-27.

DENGG, J.  
The problem of Gulf Stream separation: a barotropic approach. 1993  
J. Phys. Oceanogr., 23(10), 2182-2200.

DEWITTE, B., REVERDIN, G., AND MAES, C.  
Vertical structure of an OGCM simulation of the equatorial Pacific Ocean in 1985-94. 1999  
Journal of Physical Oceanography, 29(7), 1542-1570.

DIJKSTRA, H.A., AND MOLEMAKER, M.J.  
Imperfections of the North Atlantic wind-driven ocean circulation: continental geometry and windstress shape. 1999  
Journal of Marine Research, 57(1), 1-28.

DIJKSTRA, H.A., AND NEELIN, J.D.  
Imperfections of the thermohaline circulation: multiple equilibria and flux correction. 1999  
Journal of Climate, 12(5 Part 2), 1382-1392.

DINNIMAN, M.S., AND RIENECKER, M.M.  
Frontogenesis in the North Pacific Oceanic Frontal Zones - a numerical simulation. 1999  
Journal of Physical Oceanography, 29(4), 537-559.

DIXON, K.W., AND LANZANTE, J.R.

Global mean surface air temperature and North Atlantic overturning in a suite of coupled GCM climate change experiments. 1999  
Geophysical Research Letters, 26(13), 1885-1888.

DOBROLIUBOV, S.A. & KALINICHENKO, A.N.  
Modelling of possible oscillations of the intensity of contemporary interocean circulation. 1995  
Meteorology and Hydrology, 5, 49-55.

DONEY, S.C., W.G. LARGE AND F.O. BRYAN  
Surface ocean fluxes and water-mass transformation rates in the coupled NCAR Climate System Model.  
1998  
J. Climate, 11(6), 1420-1441.

DONOHUE, K.A. & M. WIMBUSH  
Model results of flow instabilities in the tropical Pacific Ocean 1998  
J. of Geophys. Res., 103(C10), 21401-21412.

DOOS, K.  
Influence of the Rossby waves on the seasonal cycle in the tropical Atlantic. 1999  
Journal of Geophysical Research, 104(C12), 29591-29598.

DOSCHER, R., BOENING, C.W. & HERRMANN, P.  
Response of circulation and heat transport in the North Atlantic to changes in thermohaline forcing in northern latitudes: a model study. 1994  
Journal of Physical Oceanography, 24(11), 2306-2320.

DRIJFHOUT, S.S. & WALSTEIJN, F.H.  
Eddy-induced heat transport in a coupled ocean-atmospheric anomaly model. 1998  
Journal of Physical Oceanography, 28(2), 250-265.

DRIJFHOUT, S.S., AND HEZELEGER, W.  
Stochastically forced mode water variability. 1999  
Journal of Physical Oceanography, 29(8) Part 1, 1772-1786.

DUFFY, P.B., AND CALDEIRA, K.G.  
Sensitivity of simulated salinities in a three-dimensional ocean general circulation model to vertical mixing of destabilizing surface fluxes. 1999  
Climate Dynamics, 15(2), 81-88.

DUFFY, P.B., CALDEIRA, K., SELVAGGI, J. & HOFFERT, M.I.  
Effects of subgrid-scale mixing parameterizations on simulated distributions of natural  $^{14}\text{C}$ , temperature, and salinity in a three-dimensional ocean general circulation model. 1997  
Journal of Physical Oceanography, 27(4), 498-523.

DUKOWICZ, J.K., AND GREATBATCH, R.J.  
Evolution of mean-flow Fofonoff Gyres in Barotropic Quasigeotropic turbulence. 1999  
Journal of Physical Oceanography, 29(8) Part 1, 1832-1852.

ENGLAND, M.H.  
The age of water and ventilation time-scales in a global ocean model. 1995  
Journal of Physical Oceanography, 25(11), 2756-2777.

ENGLAND, M.H.  
Using chlorofluorocarbons to assess ocean climate models. 1995  
Geophysical Research Letters, 22(22), 3051-3054.

ENGLAND, M.H.

Representing the global-scale water masses in ocean general circulation models. 1993  
Journal of Physical Oceanography, 23(7), 1523-1552.

ENGLAND, M.H.

On the formation of Antarctic Intermediate and Bottom Water in ocean general circulation models. 1992  
Journal of Physical Oceanography, 22(8), 918-926.

ENGLAND, M.H., AND RAHMSTORF, S.

Sensitivity of ventilation rates and radiocarbon uptake to subgrid-scale mixing in ocean models. 1999  
Journal of Physical Oceanography, 29(11), 2802-2827.

ENGLAND, M.H., GODFREY, J.S., HIRST, A.C. & TOMCZAK, M.

The mechanism for Antarctic Intermediate Water renewal in a World Ocean model. 1993  
Journal of Physical Oceanography, 23(7), 1553-1560.

FEVRIER, S., SIRVEN, J., AND FRANKIGNOUL, C.

An intermediate resolution model of the seasonal variability of the tropical Atlantic. 1999  
Global Atmosphere and Ocean System, 3(1), 81-106.

FLOSADOTTIR, A.H. & LARSEN, J.C.

The relation of seafloor voltages to ocean transports in North Atlantic circulation models: model results and practical considerations for transport monitoring. 1997  
Journal of Physical Oceanography, 27(8), 1547-1565.

FLOSADOTTIR, A.H., LARSEN, J.C. & SMITH, J.T.

Motional induction in North Atlantic circulation models. 1997  
Journal of Geophysical Research, 102(C5), 10353-10372.

FOX, A. D. AND S. J. MASKELL

Two-way interactive nesting of primitive equation ocean models with topography. 1995  
J. Phys. Oceanogr., 25(12), 2977-2996.

FRANKIGNOUL, C., MULLER, P. & ZORITA, E.

A simple model of the decadal response of the ocean to stochastic wind forcing. 1997  
Journal of Physical Oceanography, 27(8), 1533-1546.

FUJIO, S. & IMASATO, N.

Prognostic simulation of the world ocean circulation and its comparison with diagnostic simulation. 1997  
Journal of Oceanography, 53(3), 283-297.

GAN, J., L.A. MYSAK AND D.N. STRAUB

Simulation of the South Atlantic Ocean circulation and its seasonal variability. 1987  
J. Geophys. Res., 103(C5), 10241-10251.

GARCIA, H., CRUZADO, A., GORDON, L. & ESCANEZ, J.

Decadal-scale chemical variability in the subtropical North Atlantic deduced from nutrient and oxygen data. 1998

Journal of Geophysical Research, 103(C2), 2817-2830.

GAVART, M., DE MEY, P., AND CANIAUX, G.

Assimilation of satellite altimeter data in a primitive-equation model of the Azores-Madeira region. 1999  
Dynamics of Atmosphere and Oceans, 29(2/4), 217-254.

GENT, P.R., F.O. BRYAN, G. DANABASOGLU, S.C. DONEY, W.R. HOLLAND, W.G. LARGE AND J.C. MCWILLIAMS

The NCAR Climate System Model global ocean component. 1998  
J. Climate, 11(6), 1287-1306.

GERDES, R.  
A primitive equation ocean circulation model using a general vertical coordinate transformation. 1.  
Description and testing of the model. 1993  
Journal of Geophysical Research, 98(C8), 14683-14701.

GERDES, R., KOBERLE, C. & WILLEBRAND, J.  
The influence of numerical advection schemes on the results of ocean general circulation models. 1991  
Climate Dynamics, 5(4), 211-226.

GERDES, R., KOBERLE, C., BECKMANN, A., HERRMANN, P., AND WILLEBRAND, J.  
Mechanisms for spreading of Mediterranean water in coarse-resolution numerical models. 1999  
Journal of Physical Oceanography, 29(8) Part 1, 1682-1700.

GINIS, I., RICHARDSON, R.A. & ROTHSTEIN, L.M.  
Design of a multiply nested primitive equation ocean model. 1998  
Monthly Weather Review, 126(4), 1054-1079.

GNANADESIKAN, A.  
Numerical issues for coupling biological models with isopycnal mixing schemes. 1999  
Ocean Modelling, 1(1), 1-15.

GNANADESIKAN, A., AND TOGGWEILER, J.R.  
Constraints placed by silicon cycling on vertical exchange in general circulation models. 1999  
Geophysical Research Letters, 26(13), 1865-1868.

GOODMAN, P.J.  
The role of North Atlantic Deep Water formation in an OGCM's ventilation and thermohaline circulation 1998  
J. of Phys. Oceanogr., 28(9), 1759-1785.

GOOSSE, H., AND FICHEFET, T.  
Importance of ice-ocean interactions for the global ocean circulation: a model study. 1999  
Journal of Geophysical Research, 104(C10), 23337-23355.

GORDON, H.B. & O'FARRELL, S.P.  
Transient climate change in the CSIRO coupled model with dynamic sea ice. 1997  
Monthly Weather Review, 125(5), 875-907.

GREATBATCH, R.J.  
A note on the representation of steric sea level in models that conserve volume rather than mass. 1994  
Journal of Geophysical Research, 99(C6), 12767-12771.

GREATBATCH, R.J., LI, G. & ZHANG, S.  
Hindcasting ocean climate variability using time-dependent surface data to drive a model: an idealized study. 1995  
Journal of Physical Oceanography, 25(11), Pt.1, 2715-2725.

GREATBATCH, R.J., LU, Y., DEYOUNG, B. & LARSEN, J.C.  
The variation of transport through the Straits of Florida: a barotropic model study. 1995  
Journal of Physical Oceanography, 25(11), Pt.1, 2726-2740.

GREENBERG, D.A., F.E. WERNER & D.R. LYNCH  
A diagnostic finite-element ocean circulation model in spherical-polar coordinates. 1998

J. Atmospheric and Oceanic Technology, 15(4), 942-958

GREGORY, J.M. & MITCHELL, J.F.B.

The climate response to CO<sub>2</sub> of the Hadley Centre coupled AOGCM with and without flux adjustment. 1997  
Geophysical Research Letters, 24(15), 1943-1946.

GREINER, E. & PERIGAUD, C.

Assimilation of Geosat altimetric data in a nonlinear shallow-water model of the Indian Ocean by adjoint approach. Part II: some validation and interpretation of the assimilated results. 1996  
Journal of Physical Oceanography, 26(9), 1735-1746.
