Doug:

I have placed on the NODC anonymous ftp site, a total of 2 .zip files. When opened, these files contain 8 data sets, field periods 1997-1999, and the 8 associated metadata entry forms (see below). These data result from Gulf of Alaska - GLOBEC funded studies, 1997-1999 field periods. These are the CalVET (vertical tow) zooplankton taxon, species, weights, counts data sets. An explanation of the "CalVET" sampling net is found in the methods in each data file. These data were received courtesy of Dr. Ken Coyle, Univ. of Alaska/IMS and the IMS Database web server. These are "coastal ocean" data sets.
