## Assistance

The assembly of the OMEX I data set and its subsequent electronic publication on this CD-ROM was primarily undertaken by the individuals credited on the title page. However, it would not have been possible without significant assistance from within BODC and beyond.

The following assistance from BODC personnel is gratefully acknowledged.

**Meirion Jones**, Director BODC, undertook all the administrative work associated with the project including contract negotiations and writing the interim and final reports. For this he has the eternal gratitude of the project manager (RKL).

This CD-ROM includes between 1000 and 2000 A4 pages of documentation. All of this was diligently proof read by **Mairi Marshall**.

**Pauline Weatherall** prepared the OMEX box bathymetry object included on the CD-ROM.

The computer graphics skills of **Andy Tabor** were responsible for the art work on the CD-ROM inlays and many of the illustrations in this manual.

**Steve Loch** and **Dave Neave** produced much of the infrastructure software without which a data management project on this scale could not even be contemplated.

**Polly Machin**, **John Hughes** and **Lesley Rickards** have provided much assistance through informal supervision and advice on areas where they have specialist knowledge.

The fact that 95% of the 600 or so identified data sets were submitted to BODC bears testament to the fine spirit of co-operation from the following. The chair and secretary of the OMEX SSC, **Roland Wollast** and **Lei Chou**, and the sub-project leaders (**John Huthnance**, **Bodo von Bodungen**, **Paul Wassmann**, **Fauzi Mantoura**, **Tjeerd van Weering** and **Søren Larsen**) provided continuous support to the data management team. **Klaus-Günther Barthel**, the OMEX scientific officer in the EU MAST office, is thanked for his timely and effective reminders to OMEX partners of their contractual obligation to submit data. However, we must not forget to thank each and every OMEX scientist who took the time and trouble to fulfil these obligations.

## **Financial Support**

The OMEX I data management project was funded by two sources which are gratefully acknowledged. A MAST II supporting initiative (contract number MAS2-CT93-0073) provided the bulk of the funding with additional BODC core resource provided by the Natural Environment Research Council (NERC). Further support to project was provided by NERC through the management and administrative resources of BODC'S host laboratory, the Proudman Oceanographic Laboratory.

Further development of the data set and this electronic publication was funded jointly by the MAST III OMEX II-I bridging phase (contract number MAS3-CT96-0056) and NERC.

## **Trademarks and Copyright**

The Adobe *Acrobat* Reader software has been included on the CD-ROM and the following is acknowledged:

Acrobat(R) Reader copyright (C) 1987-1996 Adobe Systems Incorporated. All rights reserved. Adobe and Acrobat are trademarks of Adobe Systems Incorporated.

There are frequent references in this Users' Guide to the products of Microsoft Corporation. The following is acknowledged:

*Microsoft, Windows, Windows95, Word, Excel, Access and Access97* are trademarks of Microsoft Corporation.

All other company and product names herein may be trademarks or registered trademarks of their respective companies.

## **Accreditation**

Under the terms of the MAST data policy, all data on this CD-ROM will have entered the public domain by the time this CD-ROM is published. However, it is still necessary to acknowledge the source of any data used in subsequent publications just as if the CD-ROM were a journal.

Sufficient information has been provided in the Roll of Honour, in the data documentation and as originator codes tagged to the data for the originators to be identified. It is suggested that data be acknowledged by reference to the originator (e.g. Chou, 1997) with the CD-ROM cited as 'OMEX I Data Set, CD-ROM electronic publication, British Oceanographic Data Centre, Birkenhead, 1997.'
