Subject: data submission

Hello Francis,

I have just sent via FTP, 240 CTD cast files acquired during the 2000 season by the NOAA Ship WHITING and it's launches.

The data were collected using a Sea-Bird SBE 19 SEACAT profiler. Each file is in the WHOI CTD Exchange Format.

The filenames have format YYDDHMM.WHA (or W1A or W2A) where

YYMM DAY

- YY = 2-digit year
- DDD = day-of-year
- HH = hour of day (UTC)
- M = first digit of the minutes of the hour
- WH indicates the ship WHITING, W1 and W2 indicate launches

I noticed after I sent you the files that there is one named 00118182.ZZA. The file extension is in error and should probably be W1A.
