Subj: Transfer of Beaufort Sea Mesoscale Circulation CTD Data Set

Frank:

I have placed on the NODC anonymous ftp site, a total of 2 files, when opened, contain 1 CTD data set and it's associated metadata entry form (see below). This data set is resultant to the Beaufort Sea Mesoscale Circulation Study, 1986. Files contain pressure, temps. and salinity data. The data were received courtesy of the PMEL Coastal and Arctic division. It is a "mixed ocean" data set.
