Discussion

This is IDOE/WORPAX tide data received at WOSC from the Un of Hawaii. Originally it was sent to Sid Marcus in Dec 1980 and represents data taken during the period Jan 1977 - Dec. 1978. It will require a great deal of conversion to file type F181 if at all. At this point I would have reservations about totally discarding it since it is related to IDOE/WORPAX.

Recommendation

WOSC should retain these data for a definite period of time, after being fully accessioned, before a final disposition.

Accession No. 81 00451

Tape No. C 4272

WTH? department

- 1) This appears to be sea level data
 - 1) Does NODC want to archive it
 - 2) is this an original tape or a copy? Where is the other?
 - 3) NO DOF
 - 4) envelope has an accession # but there is no listing of the NADIS record for the folder
 - 5) Incoming letter returned by project manager
 - 6) This is NADISED as C120-T-Data - Why us?

More junk that will be lost in 5 years if not sooner.
