The enclosed reel of magnetic tape contains the CTD data for Dr. Arnold Gordon's survey of the Weddell Sea aboard the R/V Polarstern (W. German). Minus values in the position are for West and South. All stations show -9.90 for oxygen. The date and position for the first station is correct as the ship was diverted for approximately two weeks before it returned to the Weddell Sea region and station 2. The data have been formatted to the WHOI/NODC CTD exchange format except that the record length is 38 bytes instead of 35.

- a..One reel of magnetic tape "Winter Weddell 86", 9 track, 6250 bpi, ascii, recsize=38, blocksize=380, 152 files, format=WHOI/NODC CTD exchange
- b..Sample dump of the first 2 and last files/stations.

The enclosed reel of magnetic tape contains the CTD data for Dr. Arnold Gordon's survey of the Weddell Sea aboard the R/V Polarstern (W. German). Minus values in the position are for West and South. All stations show -9.90 for oxygen. The date and position for the first station is correct as the ship was diverted for approximately two weeks before it returned to the Weddell Sea region and station 2. The data have been formatted to the WHOI/NODC CTD exchange format except that the record length is 38 bytes instead of 35.

- a..One reel of magnetic tape "Winter Weddell 86", 9 track, 6250 bpi, ascii, recsize=38, blocksize=380, 152 files, format=WHOI/NODC CTD exchange
- b..Sample dump of the first 2 and last files/stations.
