Subject: SISMER CTD and bottle data

Dear Harry and Bob,

You will find on our ftp the CTD and bottle data put in the public domain this year.

The file is a tar unix file compressed (25 Mo, 100 Mo when uncompressed)

There are :

- . 1873 CTD stations (1 station = 1 file)
 - . 95 bottle stations in 2 files (1 file = 1 cruise)
- at the MEDATLAS format which is familiar to you, now.

to get the file :

ftp [ftp.ifremer.fr](ftp://ftp.ifremer.fr) (ou ftp 134.246.142.1)

login : anonymous

passwd : your email

cd /ifremer/sismer/donnees

bin

get sismer98.tar.Z

quit

Please can you tell me when you'll get the file so that I can delete it from our [ftp](ftp://ftp.ifremer.fr).

Hoping you will not have problems with the data,

Best regards,

Michele
