Dear NODC Data Officer,

On behalf of Stan Jacobs, please be advised that I have placed the file apis.tar.gz in the NODC incoming ftp site as per the instructions on your web site. The file is a gzipped SUN (unix) tar file containing 85 files, a Readme file and 84 data files containing high resolution CTD data from the Ross Sea in the form; apis.0nn where nn is the station number from 01 to 84. A more thorough data analysis document is currently being prepared and can be forwarded to you when complete. Please let me know if you have any problems or questions with the data.

Thank You,
Phil Mele pmele@ldeo.columbia.edu
