Hi again, Francis,

Attached is file NRT1\_SVD\_ARCHIVE\_2007.zip.

It contains 6 Digibar sound velocity cast files acquired by Navigation Response Team 1 (NRT-1) during the 2007 season.

Each file contains header information followed by depth and sound velocity down the water column. Data were acquired using an Odom Digibar Pro Profiler, Serial number 98294.

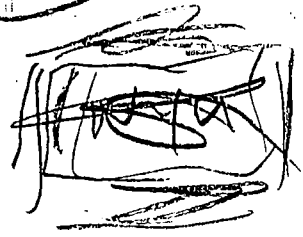

All the filenames have format YYDDHHMM.N1D where

YY = 2-digit year  
DDD = day-of-year  
HH = hour of day (UTC)  
MM = minutes of the hour  
N1 indicates NRT-1  
D indicates a sound velocity vs depth archive file.
