

This directory includes the following files:

- esilin.e00 (lineset export file for ARC/INFO)
- esishd.e00 (shadeset export file for ARC/INFO)
- esimrk.e00 (markerset export ifile for ARC/INFO)
- fnt039.e00 (ARC/INFO IGL font pattern export file)
- fnt040.e00 (ARC/INFO IGL font pattern export file)
- esilin.txt (ASCII file with short descriptions of lineset symbols)
- esishd.txt (ASCII file with short descriptions of shadeset symbols)
- esimrk.txt (ASCII file with short descriptions of markerset symbols)
- esifnt.txt (ASCII file with short descriptions of IGL font patterns)
- lut directory (contains info export files of lookup tables for esi symbology)
- esiarc.e00 (lookup table for esi shoreline types lineset)
- esipoly.e00 (lookup table for esi polygon features to esi shadeset)
- socarc.e00 (lookup for management covers to esi lineset)
- socpnt.e00 (lookup for socecon point data to esi markerset)

The above files were created with ARC/INFO 7.0.3 on a HPUX platform. They should operate correctly on any UNIX or NT platform running ARC/INFO 7.0 or later.

The files fnt039 and fnt040 must be installed in the \$ARCHOME/igl63exe directory before starting ARC/INFO. These files contain the font patterns used to create the markerset.

The esilin, esishd, and esimrk files may be stored any where on the disk, but can be accessed easier from ARC/INFO if they are installed in the \$ARCHOME/symbols directory.

You may need to contact your system administrator to install the files into the above directories.
