

Deepwater Horizon: A Preliminary Bibliography of Published Research and Expert Commentary

Compiled by Chris Belter, NOAA Central Library

Last Updated: June 16, 2011

About This Bibliography

This bibliography attempts to list all of the published research and expert commentary that has resulted from the Deepwater Horizon oil spill. It includes peer-reviewed journal articles and book chapters, technical reports released by scientific agencies and institutions, and editorials published in peer-reviewed journals. The peer-reviewed publications and technical reports in this bibliography are sorted into three subject categories: natural, medical, and social sciences. Data sets, fact sheets, maps, and news items not published in peer-reviewed journals are outside the scope of this bibliography. Suggestions of articles not listed in this bibliography may be emailed to [Chris Belter](mailto:Chris.Belter@noaa.gov). This bibliography will be updated regularly as new articles and reports are published.

In addition to this bibliography, the NOAA Central Library has also compiled a more comprehensive bibliography on oil spills and oil spill remediation around the world entitled "[Resources on Oil Spills, Response, and Restoration: A Selected Bibliography](#)".

Note: Publications marked with a  were written by at least one NOAA-affiliated author.
