Hi Scott-

Enclosed please find the CDROMs/DVDs you requested. In addition to the Hudson Shelf Valley and Myrtle Beach reports, I found and am sending the Massachusetts Bay Internal Waves Experiment data.

Please remember and note somewhere that these data may be superseded by files on our server (<http://stellwagen.er.usgs.gov>). The best source of our data is either from the stellwagen server or a mostly CF compliant version is available on our THREDDS server at [http://coast-enviro.er.usgs.gov/thredds/allts\\_catalog.html](http://coast-enviro.er.usgs.gov/thredds/allts_catalog.html). The organization of data by experiment is consistent between the two kinds of servers, so a user can browse for suitable data on stellwagen, and then once the files of interest are identified, the THREDDS server may be used for direct access.

Please don't hesitate to contact me if you have any questions.

Best,

Ellyn Montgomery
