R/V Melville SIC: Margaret Tivey per	Operator Log 05-Apr-2005 - 11-May-2005		TUIM05MV SCG: Robert Harper

04-Apr-05 00:13:32Z (harper)	Ashtech	Reset the Ashtech.	
04-Apr-05 20:59:37Z (harper)	AshTech	Reset Ashtech for the second time in the last 24 hours.	
04-Apr-05 22:55:02Z (harper)	SeaTel	Seatel Secure for man aloft	
04-Apr-05 22:55:52Z (harper)	Fleet 77	Fleet 77 secured for man aloft.	
05-Apr-05 00:16:52Z (harper)	Seatel	SeaTel in back online.	
04-Apr-05 23:58:56z (harper)	ACDP	ADCP Started.	
05-Apr-05 00:03:32z (harper)	SeaBeam	SeaBeam started.	
05-Apr-05 16:30:07Z (harper)	Seabeam	Late entry alert from Nagios indicating Service : SB2K-Pros Host: GeorgeM Address: 137.110.150.12 State: Critical	
ur:1][SB2K_ether:1]		Process Critical [SB2K_merge:0][SB2K_sidescan:1][SB2K_conto	
		All graphics and plotts are fine. Will investigate.	
05-Apr-05 16:52:13Z (harper)	Pinging Equipment	Stopped all pinging equipment on station.	
05-Apr-05 17:47:15Z (harper)	GeorgeM	Manually started SB2K_merg.	
05-Apr-05 21:33:51Z (harper)	ADCP	Started both ADCP systems per scientist request.	
06-Apr-05 e DOrt.init script.	GeorgeM	In the process of trying to get SB2K_merg running, I ran th The script started multiple instances of everything process	

SIC: Margaret Tivey	R/V Melville Operator Log		SCG: Robert Harper
<p>in the script it's called to execute. As, I now understand these processes can have only one instances running. I stop all but one instances of each process, now Nagios in happy again. 00:52:28Z (harper)</p>			
<p>06-Apr-05 22:32:04Z (harper)</p>	SeaBeam	Started Seabeam	
<p>06-Apr-05 23:29:16Z (harper)</p>	Seatel	Seatel stopped for man aloft.	
<p>06-Apr-05 23:58:51Z (harper)</p>	SeaTel	SeaTel enabled.	
<p>07-Apr-05 02:36:50Z (harper)</p>	Daily Backup	Perform Daily backup.	
<p>08-Apr-05 01:51:36Z (harper)</p>	Seatel	<p>SeaTel has not been able to communicate with sdsioa for 16 hours now. I placed a call to Woody via the F77 to see if anyone was there to look into the problem. There saw no one there, hopefully tomorrow someone will notice the server is drop.</p>	
<p>08-Apr-05 01:55:37Z (harper)</p>	SeaBeam	<p>We have not collected any seabeam data atfer leaving port, I spoke with the scientist and there will be no need to run seabeam on station.</p>	
<p>08-Apr-05 01:59:41Z (harper)</p>	Daily Backup	Perform daily backup.	
<p>09-Apr-05 02:24:09Z (harper)</p>	Daily Backup	Perform Daily backup.	
<p>09-Apr-05 07:40:15Z (harper)</p>	Seatel	<p>Seatel is down and I am getting a huge signal that covers half the analyzer's screen. Each time I execute the search mode I get the same lock, before I was able to get a receive light but not within the last 6 hours or so. I have gone through the Comtech user manuals looking for some type of configuration check list without any look. I am reluctant to make any change due to my lack of experience with the system. Note: Is it normal for the remote light to blink, it flashed for a few seconds and I have not seen it or the receive light again.</p>	
<p>09-Apr-05</p>		<p>This is going to be a long cruise if this is not resolved soon.</p>	
<p>11-Apr-05 23:00:31Z</p>	Seabeam	Started Seabeam for MOSS Net	

SIC: Margaret Tivey	R/V Melville Operator Log		SCG: Robert Harper
(harper)			
12-Apr-05 15:48:43Z	Seabeam	Seabeam for Jason dive.	
(harper)			
13-Apr-05 01:52:06Z	Daily Backup	Daily backup performed.	
(harper)			
15-Apr-05 04:15:08Z	georgem	Cruise leg on georgem missing rcp the file all is good.	
(harper)			
18-Apr-05 20:54:56Z	XBT	Bad data curve at the very end.	
(harper)			
18-Apr-05 21:00:12Z	XBT	Reboot XBT low on resources would launch MK21 program.	
(harper)			
19-Apr-05 02:04:48Z	SVP	Applied SVP.	
(harper)			
22-Apr-05 21:28:53Z	XBT	2 XBTs failed one started before I pulled the pin and other a bird hit the wire.	
(harper)			
01-May-05 01:41:59Z	SVP	Applied SVP to SeaBeam	
(harper)			
01-May-05 22:07:20Z	SeaBeam	Started Seabeam for mocness.	
(harper)			
01-May-05 22:42:42Z	Seabeam	Appied SVP file to Seabeam.	
(harper)			
03-May-05 23:18:31Z	Bridge	Modified the setting in Eudora for the F77 email connection . Save the old settings in My Documents and created and account for Melville on THUMMS. Email for c-link were not going out . Will reset to original configuration once HiSeasNet is repaired.	
(harper)			
06-May-05 21:53:04Z	ADCP	Stopped both ADCP computers entering port of Tonga.	
(harper)
