I have acquired a new data set in DVD from Korea Hydrographic Oceanographic Administration (KHOA), which is to be accessioned and archived. The DVD contains data measured and collected during 2010 with four folders (directories) as following:

1. "DT" directory - ten (10) tidal observation stations
2. "IEODO" directory - one station named "Ieodo"
3. "Ocean Station" directory - three ocean observation stations
4. "TW" directory - two buoy stations
