From: John Toole

Subject: archival of Ice-Tethered Profiler data by the National Centers for Environmental Information

---

As we have discussed, I formally request that the NOAA NCEI host and archive observations derived from the Ice-Tethered Profiler program (ITP - see [www.whoi.edu/itp](http://www.whoi.edu/itp)). I understand that on a 3-month interval, NCEI will download, update and archive new and changed files accessible from our ITP website. We greatly appreciate the NCEI's efforts to both safeguard the ITP data collection into the future and join our efforts to make the observations widely accessible.
